YOUTH

In Ten Years

In ten years I see Utila as a booming paradise, fully equipped with road access to the Cays and North Side. Hey, maybe even a seven floor shopping mall complete with gym and movie theater. By that time, we'll need about five or six more hotels to accommodate the amount of tourists attracted by either the Utila Carnival or Sun Jam. All of the young people of today will probably be married with kids running around everywhere, so I guess that'll mean we'll have to build a new school to handle the capacity of little island children. We will probably have about 5 or 10 cruise ships coming in a week. The road to the new airport will

definitely be full of houses and buildings constructed by either locals or foreigners looking to make a life on the island. The number of motorcycles will increase about 200% so something will have to be done about the roads. Utila mostly has everything that an island could want, a relaxing atmosphere during the day and an exiting adult nightlife. But the one thing Utila will need is a youth friendly dance hall for minors to have something to do. Until then Utila will have to take everything that is thrown at her and jump for every new and good that comes along.

Bay Islands College of Diving

A World of Dive Education

Mention this for **\$5 off** Whale Shark Research trips !!!

Bay Islands College of Diving

Courses:

- ~ Open Water to Rescue
- ~ 'Go Pro' Divemaster & Instructor training
- ~ Nitrox & many specialties

Fun Dives

- ~ Cheap packages incl. North Side dives & Whale Shark trips

www.dive-utila.com

BICD Facilities

- ~ air conditioned classrooms
- ~ up to 6 dives a day
- ~ internet Cafe
- ~ large boats
- ~ retail store
- ~ massage therapists & a hot tub!

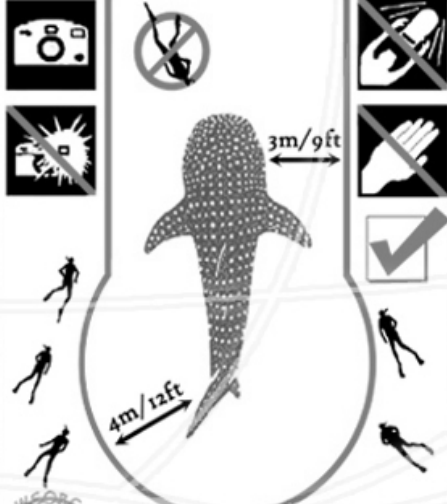

Cafe Bar-acuda

- ~ Bar & vegi restaurant, cheap beer!
- ~ Daily events... trivia, jam session, movies, marine life presentations

Hyperbaric Chamber Trauma Centre

- ~ Ear Exams
- ~ Chamber Courses
- ~ Recompression Therapy

Code of Conduct for Swimming with Whale Sharks

Bottom right leg section from Mrs Marais' wetsuit, removed on the boat with scissors showing possible teeth marks.

the wound was shark inflicted this will be the first recorded incident of its kind in Utila. Mrs Marais returned to California after a short stay in a La Ceiba hospital and is currently undergoing surgery on her leg. The family are in communication with Laguna Beach resort and have expressed their wishes to return and complete their vacation.

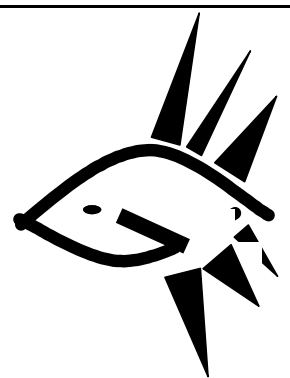

Las especulaciones todavía rodea la misteriosa herida de 4 pul ocurrida a la turista Doty

Marais, cuando se sumergia a nadar con un Tiburon ballena en la parte norte de la isla el 10 de abril.

Al corto tiempo de haber ingresado al agua la sr. Marais comenzo a llorar al verse rodeada de sangre segun su hijo Ryan Marais de 11 anos de edad. Afortunadamente su esposo un entrenado cardiologo se encontrba alli y junto a los tripulantes le dio la asistencia medica hasta llegar a la isla. De acuerdo al Dr. Mc Vay de la clinica comunitaria de utila la sra. Marais se encontraba con: una herida de 4 pul en la pierna

derecha y tibia en la misma pierna ,en la izquierda tenia otra cortada. Segun el Dr. Mac Vay la herida se semejaba a una mordida El sr. Patrik Duoglas experto en ataques de tiburones estaba presente en la sala creo que fue una mordida basando en la rotura del traje de buseo. Otros tiburones llamados tiburones Silky, a menudo rodean el Tiburon ballena y acostumbran atacar en defensa propia causando heridas profundas. La sr. Marie Lavente que trabaja en el Intituto de investigacion de ataque de Tiburon obtu-

vo fotografias y luego de estudiarlas llego a la conclusion que el atacante podria ser un Baracuda o un Wahoo. Ambos peces tienen la capacidad de alcanzar una proporcion masiva. Se considio que la Sra. Marais fue muy desafortunada al dirigirse a una ramada de" peces grandes" aun mas al encontrarlos con la boca abierta. El impacto sobre la criatura al tener la boca abierta fue suficiente para ocasionar la herida. Si los resultados pendientes concluyen en que fue una mordida de Tiburon seria el primer caso grabado en la isla de Utila. La sra. Marais regreso a California despues de una corta estadia en un hospital de la Ceiba donde le practicaron una cirugia en la pierna. La familia sigue en comunicacion con Laguna Baech resort y han expresado su deseo de regresar a completar sus vacaciones a la isla. ■

Municipality Talks

Another busy month at the mayors office! Here is the low down of what's been going on:

▼▼ **Two desalination plants** donated by the Spanish government are on route to Utila, awaiting transport in Puerto Cortez. The machines are part of a \$2 million project to supply drinking water to the Cays through underwater pipelines (work on installing the 10km, 4" pipes is nearing completion).

▼▼ **Campanado** celebrated the connection of Shelby McNads well, providing a much needed alternative water supply and easing pressure on other areas. Water difficulties suffered by those on the point were also uncovered and the situation resolved.

▼▼ **General** cleaning and maintence focused on refurbishing the cemetery, clearing the garbage dump and trimming the grass at the airport. Reconditioning work was carried out on the garbage truck.

▼▼ **100 plastic water systems** are set to be provided for by Canadian aid to any home owner currently without. Apply within the

next few months.

▼▼ **In the pipelines** there are plans for a stylish conference centre to be erected on the Champas beach and for the positioning of breakwaters to prevent beach erosion. The inevitable and much talked about road to the northside is also in the planning stages.

Otro mes ajetreado en la oficina del alcalde! Aquí esta un rápido resumen de lo que se ha estado haciendo:

▼▼ **Dos plantas desalinizadoras** donadas por el gobierno español están en camino a Utila, esperando ser transportadas desde Puerto Cortes. Las maquinas son parte de un proyecto de \$2 millones para abastecer de agua potable a los Cayos a través de

tuberías subterránea, trabajo de instalación de 9km de tuberías de 4" que esta por completarse.

▼▼ **Camponado festejo** la conexión al pozo de Shelby Mc Nab, abasteciendo de agua al área y facilitando la presión a los otros barrios. Dificultades en el suministro de agua a La Punta también fueron cubiertas y la situación rectificada.

▼▼ **Limpieza y mantenimiento** general este mes se enfoco en arreglar el cementerio, en despejar el botadero municipal, en el corte del área de sácate en el aeropuerto y en reacondicionar el carro recolector de basura.

100 sistemas de recolección de agua lluvia pronto serán proveídos por la Embajada de Canadá a residentes de bajos recursos que no tengan acceso a agua potable y a costearse un sistema de recolección de agua. Aplicaciones serán aceptadas en los próximos meses.

▼▼ **En la playa de Chepas** hay planes para su reestructuración y la construcción de un centro de usos múltiples y del posicionamiento de rompeolas para prevenir la futura erosión de la playa. El inevitable y bastante comentado camino hacia el lado norte esta también en planificación. ■
